DIARY NOTES

25X1A

ADD/A (Colonel White)

30 April 1952

1. Had a conference with [REDACTED] Chief of the Processing Branch, Signal Center, in connection with furnishing DD/A's Office with cables which involve administrative support. A folder of cables will be sent to my office each morning at about 10:00 a.m. and I will, through trial and error, try to work out a system which will help us to speed up the solution of administrative support problems in the field. In this regard I also had a talk with Mr. Hulick of DD/P's Office who advised me that [REDACTED] is furnished a summary of cables each morning and that it had been assumed that this met our needs. We agreed that such a summary might be helpful but in all probability would not accomplish our purpose. I will arrange with John to have a look at these summaries during the next few days to determine to what extent, if any, they will meet our needs.

that are not reflected in normal T/O's. It is believed that by getting a monthly report from the Special Contracting Officer and the Commercial Division we will know pretty accurately what this strength amounts to. I will make these arrangements.
